List of Tables

2.1	Continuous Observations for Illustrative Example	26
2.2a	The Binary Representation of the Observations in the Illustrative	
	Example (first set of attributes for each example)	28
2.2b	The Binary Representation of the Observations in the Illustrative	
	Example (second set of attributes for each example)	28
2.3	The $NEG(A_k)$ Sets for the Illustrative Example	40
2.4	Some Computational Results When $n = 30$ and the OCAT	
	Approach Is Used	48
2.5	Some Computational Results When $n = 16$ and the SAT Approach	
	Is Used	49
2.6	Some Computational Results When $n = 32$ and the SAT Approach	
	Is Used	49
3.1	The $NEG(A_k)$ Sets for the Illustrative Example	58
3.2	The $POS(A_k)$ Sets for the Illustrative Example.	58
3.3	Description of the Boolean Functions Used as Hidden Logic/System	50
5.5	in the Computational Experiments.	65
3.4	Solution Statistics.	66
3.5	Solution Statistics of Some Large Test Problems (the Number of	
	Attributes Is Equal to 32).	69
3.6	Descriptions of the Boolean Function in the First Test Problem (i.e.,	
	when ID = 32H1)	70
	,	
4.1	Numerical Results of Using the RA1 Heuristic on the Wisconsin	
	Breast Cancer Database.	87
4.2	Numerical Results of Using the RA2 Heuristic on the Wisconsin	
	Breast Cancer Database	90
4.3	Comparison of the RA1 Algorithm with the B&B Method (the total	
	number of examples = $18,120$; number of attributes = 15)	94
4.4	Comparison of the RA1 Algorithm with the B&B Method (the total	
	number of examples $= 3.750$; number of attributes $= 14$)	95

xxxii	List of Tables	
-------	----------------	--

5.1a 5.1b 5.2	Some Computational Results Under the Random Strategy. Some Computational Results Under the Guided Strategy. Computational Results When the Wisconsin Breast Cancer Data Are Used.	115
6.1 6.2	Number of Documents Randomly Selected from Each Class	
6.3	Classified All 510 Documents	
6.4	OCAT and IOCAT	
6.5	Experiment	
6.6 6.7	OCAT and IOCAT	
	Boolean Functions.	144
7.1	Some Computational Results When $n = 30$ and the OCAT Approach Is Used	150
8.1 8.2	Solution Statistics for the First Series of Tests Solution Statistics When $n=10$ and the Total Number of Examples	
8.3	Is Equal to 400. Solution Statistics When $n = 30$ and the Total Number of Examples Is Equal to 600.	
9.1	Comparison of Sample and Class Sizes for Biopsy and Cancer (from Woman's Hospital in Baton Rouge, Louisiana, Unpublished Data, 1995).	
10.1	History of Monotone Boolean Function Enumeration	
10.2	A Sample Data Set for Problem 3	
10.3	Example Likelihood Values for All Functions in M_3	
10.4	Updated Likelihood Ratios for $m_z(001) = m_z(001) + 1$	
10.5 10.6	The Representative Functions Used in the Simulations of Problem 3. The Average Number of Stage 3 Queries Used by the Selection Criterion max $\Delta\lambda(v)$ to Reach $\lambda>0.99$ in Problem 3 Defined on	220
	$\{0, 1\}^n$ with Fixed Misclassification Probability q	222
11.1	Ratings of Midsize Cars that Cost Under \$25,000 [Consumer Reports, 1994, page 160]	233
12.1	Summary of the Required CPU Times Under Each Method	255

13.1	•	266
13.2 13.3a	Average Number of Indexing Words Used in Each Experiment Summary of the First Experimental Setting: Leave-One-Out Cross	266
13.34	Validation (part a)	269
13.3b	Summary of the First Experimental Setting: Leave-One-Out Cross Validation (part b).	269
13.4a	Summary of the Second Experimental Setting: 30/30 Cross	209
10 41	4 /	270
13.4b	Summary of the Second Experimental Setting: 30/30 Cross Validation (part b).	270
13.5	Statistical Difference in the Classification Accuracy of the VSM and	
13.6	OCAT/RA1 Approaches. Data for the Sign Test to Determine the Consistency in the Ranking	272
13.0	· · · · · · · · · · · · · · · · · · ·	272
13.7	Percentage of Documents from the Population that Were Inspected by the Oracle Before an Accuracy of 100% Was Reached	275
14.1	•	278
14.2	Summary of the Prediction Results	287
15.1a	Attributes for the Breast Cancer Data Set from Woman's Hospital in	
15.1b	Baton Rouge, LA (Part (a); Attributes 1 to 16)	290
13.10	*	291
15.2a	Interpretation of the Breast Cancer Diagnostic Classes (Part (a);	291
15.2b	Malignant Classes Only)	291
1.5.0	Benign Classes Only).	291
15.3	, and the second se	292
15.4a	Sets of Conditions for the Inferred Rules for the "Intraductal Carcinoma" Diagnostic Class (Part (a); Rules #1 to #5)	293
15.4b	Sets of Conditions for the Inferred Rules for the "Intraductal	
		294
15.4c	Sets of Conditions for the Inferred Rules for the "Intraductal Carcinoma" Diagnostic Class (Part (c); Rules #10 to #12)	295
	Carcinoma Diagnostic Class (1 art (c), Rules #10 to #12)	49J
