UREC
Client Tracking System
The Urban Restoration Enhancement Corporation (UREC) is a not-for-profit organization that specializes in affordable housing, education, training, and social and economic development.

Our project deals with a program of UREC's that educates entrepreneurs about the way to start and maintain a successful business.

As a non-profit organization, UREC's funding comes primarily from state and federal governmental grants.
Currently, there are no mechanisms in place at UREC to produce documentation about outcomes, measurements, or feasibility of UREC's services in an effective manner. Looking through the binders does not allow UREC to easily see trends or patterns that could be useful in enhancing their service.

Because UREC's funding is reliant upon grants, their current situation is limiting their ability to receive said grants, which in turn limits their ability to create and maintain new programs to serve the community.
Requirements

- **Known**
  - Accessible from anywhere
  - Easy to interface with
  - Is able to produce graphical information
  - Catalog courses and student information
  - Provide accountability information for grant proposals

- **Unknown**
  - Infrastructure in place at UREC facility
  - Definition of success
  - Plotting of generated reports
Our project is designed to track and produce data on this service that may be used to measure program outcomes.

Features
- Online Access
- Course Management (Registration Process)
- Tracking of Follow-ups
- Advanced Search
- Report Generation
- Management Pages to configure code tables

Specifications
- ASP.NET
- MySQL
Implementation

- Database
  - Students
    - Business model
    - Financial information
  - Courses
  - Financial information

- Website
  - Interacts with database
  - Provides all necessary functionality
  - Simple user interface
  - Generate reports
    - Graphical output
