Major Functions

Function	Description	Inputs	Outputs
“Platinum Record” magazine	Currently available in pdf form only, but will soon be available on the website (as HTML)	Text, pictures and other media to be published in the magazine	By Our Solution: Generated HTML page(s) that can be edited later via control panel
Event Calendar	Lists events pertaining to EBRCOA's operations	Date, time, location and other information relevant to each event	By Our Solution: Generated event within a calendar system which can be edited or removed via control panel
Organization Information pages	This includes pages like the “About Us” and “Contact Us”. These pages may need to be edited at any time.	Updated information for each respective page	By Our Solution: Generated HTML page(s) that can be edited later via control panel
Senior Olympics registration form	Allows visitors to register for the Senior Olympics on the website	Registrant name, age, sex, and many other fields necessary for registration used to create the form. We may also accept CSV files for input of multiple records at once.	By Our Solution: Output participants for each category in groups based age. By Us: Create an interactive web-based form that is uploaded to a database upon submission.
Subscription/Feedback forms	This includes any form that will register a user for EBRCOA services or allows a user to send personal information to EBRCOA	User name, question, comment, address or any other necessary information for each respective form	By Our Solution: Notify Jeremy of any feedback/new subscriptions. Send emails to mailing lists By Us: Create an interactive web-based form that is uploaded to a database upon submission. Create a mailing list Jeremy can send emails through.

By Us means the result is something produced by us, such as the PHP and SQL to handle the form.

By Our Solution means that the output will automatically be generated by our program.
