CITY-WIDE BUS-TRANSPORTATION SYSTEM ER-MODEL

DRIVERS
(Dr#, DrName, Address, Tel, DrLic#, LicState, LicExpDate)

DR-SCHEDULES
(startDate, EndDate)

BUSES
(Lic#, Model, Make, Cost, PurchDate, DealerName)

REPAIR-WORK-ORDERS
(Order#, RepCost, RepType, ServOffDate, ServRetDate)

REPAIR-SHOPS
(RepShop#, Address, Tel)

ROUTES
(Rt#, fromStop, toStop)

Question:
•? If we assume there are different "shifts" (morning vs. evening, etc) of operations, how will the ER-model change? Show the new entity-sets (and relationships), including their impacts on the existing relationships.
